

n.e.w. tent manufacturing

Products packaged at ASPIRO:

ASPIRO does sub-assembly for frame and pole tents including: clips, straps & rings, packages tent pins, and measures & cuts tent ropes.

What is your satisfaction level with the output of your product?

The team is great to work with - always producing high quality outputs in an extremely timely fashion. We have been so happy with our ASPIRO relationship that we are considering placing an individual onto our team full-time in our facility!

Why did you choose ASPIRO to partner with your business?

We chose ASPIRO for two reasons. The first reason is that my cousin, Jacob, is a consumer at ASPIRO - and we love to support him. The second reason is that we are always looking for creative ways to source our products; as we are a seasonal business with limited resources (especially in the summer).

In our first season, we did all the work that ASPIRO now does in house and it created some backlogs due to the sheer volume of prep work. Now with ASPIRO on our team we are able to focus on finishing orders and never have to worry about backlogs. Working with ASPIRO allows us to support a great organization while keeping our manufacturing costs reasonable.

About N.E.W. Tent Manufacturing

We manufacture and sell all our party tents right here in Green Bay, WI with high quality materials. We pride ourselves on providing exceptional service and creating a superior product to fit your needs - whether in the event rental industry or for your small business or event venue. We have sold our commercial party tents all over the world and are proud to be American made.
