January 20, 2021

ASPIRO has some exciting news to share with you! Wisconsin has announced that individuals 65 and older will be eligible for the COVID-19 vaccine beginning January 25<sup>th</sup>. If you are eligible and interested in receiving the vaccine, please contact your health care provider to schedule an appointment. ASPIRO will not be administering the vaccines. You will need to go to an approved vaccination site.

Last week our staff became eligible and many have already received their first dose. Although the vaccine is not mandatory, we encourage those eligible to receive it. This is one more step we can take to continue to provide a safe environment for the people we serve.

Please note that even if you are vaccinated it is unknown if you will be able to transmit the disease to others. As a result, we will still be requiring masking and social distancing for those attending in person services or entering our buildings.

As we know more information about who is eligible for the vaccine we will share that with you. For more information on the COVID-19 vaccine phases and eligibility please go to this website: <https://www.dhs.wisconsin.gov/covid-19/vaccine-about.htm>.

Stay safe and take care.
